Drought Summit web cast series begins Tuesday

With dry and warm weather expected to continue, management decisions will be critical for agricultural producers and families to maintain the resource base of their operations, according to Colorado State University Extension specialists.

The Golden Plains CSU Extension office is planning to host its Drought Summit webcast series to provide critical drought management information to producers and their families.

Drought Summit dates, web cast origination locations and topics are:

- » Tuesday, Burlington Community Center in Burlington (Weather updates and crop insurance issues)
- » Feb. 19, Washington County Events Center in Akron (Crop production issues, forage production with limited irrigation, entomology and insect concerns during drought)

- » Feb. 26, Yuma Community Center in Yuma (Livestock production issues, including herd liquidation and tax consequences and livestock disease during drought)
- » March 5, Phillips County Events Center in Holyoke (Managing wind breaks, perennials and ornamentals during drought)
- » March 12, Phillips County Events Center in Holyoke (Range management issues, pasture management, invasive weeds and insects)
- » March 19, Sedgwick County Courthouse Annex in Julesburg (Human resources issues, family financial management and communications)
